PHYSICAL FITNESS TEST

The physical fitness assessment is designed to test the candidate’s current level of physical fitness and his/her capacity to undergo the rigours of military training. It is composed of two aspects;

a. Aerobic endurance
   Local muscular endurance

b. Components of physical fitness, consisting of body fat assessment, hand grip strength and flexibility.

FORMAT OF TEST

Aerobic endurance
(This is a pass or fail test) Candidates will be required to run one and a half miles within the time limit below:

<table>
<thead>
<tr>
<th></th>
<th>Males</th>
<th>Females</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>11 mins 40 secs</td>
<td>13 mins 10 secs</td>
</tr>
</tbody>
</table>

Local Muscular Endurance

If a candidate fails to meet any of the above minimum requirements, he/she will not be permitted to proceed to the next stage of the competition.

Candidates will also undergo an assessment which includes three components of physical fitness as follows:

Body Composition Assessment
This assesses the candidate’s percentage of body fat. The candidate will be subjected to a body/mass index test.

Strength
Assessed using hard grip strength dynamometer which gives an indication of overall muscular strength.

Flexibility
Assessed using various flexibility aids (hamstring and lower back flexibility).

All tests are conducted in sports gear. Candidates are advised to bring the following should they be requested to attend: tracksuit, shorts, singlet/t-shirt, training shoes, towel, and wash gear etc.
Candidates who wish to prepare for the above tests should do so under the guidance of a qualified instructor.

  - This is your target Heart Rate to improve your Cardio-Vascular Endurance)*(Required Intensity).
  - Check your HR pre and post exercise.

**Cool Down:**

- Just a general reduction in pace to decrease blood flow to the activated muscles.

**Stretching:**

- Stretching is very important pre and post exercise.
